REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The closest prior art is Daniels (US 6,527,433). However, Daniels ('433) does not disclose the claimed relationship between the opening plane and the rotation axis, in combination with the remaining limitations of the respective independent claims. Other close prior art references such as Blessing (US 1,412,992) and Gillanders (US 2,311,379) are also distinguished. Blessing ('996) fails to reasonably disclose "a container having a longitudinal axis substantially centered within said container wall", as the container of Blessing ('996) fails to have a symmetry consistent with the existence of such an axis. While Gillanders ('379) discloses a container wall (66) having a longitudinal axis substantially centered with said container wall, an upper edge of the container wall forming an opening which defines a plane, and a rotational axis which is not perpendicular to this plane, the rotatable blades disclosed by Gillander are not disposable with the container wall.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
